

To Our Valued Customer,

We are excited to announce that on Monday, May 2, 2022, Briess will upgrade its ERP system to Aptean JustFood, a best-in-class software which features Microsoft Business Central as its engine. We have grown significantly since our previous software system was implemented, and conversion to JustFood will drive more standardization, efficiency, and operational effectiveness. This new technology will ensure that we will be able to continue to provide the service you expect and deserve from Briess.

We have taken extensive steps to ensure that this ERP transition is a success. This includes, but is not limited to, dedicating a team of internal and external experts to this project for more than one year; extensively training all Briess employees in the new system and ensuring everyone works together for a smooth transition; and thoroughly testing the system prior to launch to ensure business continuity. While any major software transition carries its challenges, we have invested significant time and effort to ensure that you experience little to no disruption in our ability to service your business.

You will receive additional communication in April as we draw closer to the Go Live date, but in all cases, we will keep you informed of any changes.

Please note that all our Terms & Conditions of sale will remain the same, and no customer action is required at this time.

If you have any questions, please contact your Division Manager or any one of us. Thank you for being a valued customer and for your support during our implementation of our new ERP.
